New well path forward

Tonight's work meeting is to discuss how to move forward with the need for a new well and its location.

Mayor Stump has spoke with Scott Payne who is the Principal Environment Scientist with Northern Rockies Engineering, Inc. He believes that we could dig a well on Tuke Lane that could easily pump 500 gallons per minute. The problem is the cost to pipe the water back to the town. Do we use one engineering firm or should we break up the project? Discussion

The meeting was adjourned at 8:13 pm.

Approved: Robert Stump, Mayor
